

HlogiX LLC

Innovative IT Solutions for Your Business

Chantilly, VA | hlogix.com | (703) 334-7124 | info@hlogix.com

COMPANY OVERVIEW

HlogiX LLC is a Virginia-based information technology firm providing expert consulting, application development, project management, and semiconductor design and compliance services. With a commitment to excellence, transparency, and client-centered delivery, HlogiX partners with businesses to leverage cutting-edge technology, optimize operations, and achieve measurable results. Our team of skilled professionals brings deep domain expertise across IT infrastructure, regulated manufacturing environments, and software engineering.

CORE CAPABILITIES

Capability Area	Description
IT Consulting	Network management, cybersecurity advisory, cloud computing solutions, software selection & implementation, system architecture design and optimization.
Project Management	End-to-end project lifecycle support — planning, execution, monitoring, and closeout. On-time, on-budget delivery with rigorous quality standards.
Application Development	Custom, scalable, user-friendly software solutions tailored to client requirements. Web, mobile, and enterprise application design and deployment.
Semiconductor Design & Training	End-to-end design, specification, and technical documentation services for semiconductor and technology solutions.
FDA 21 CFR Part 11 Compliance	Electronic records/signatures, role-based access, audit trails, validation plans, SOPs, training modules, and FDA inspection readiness.
Auditing & Qualification (IQ/OQ/PQ)	Internal/external audit support, Installation/Operational/Performance Qualification, QC/QA oversight, gap assessments, and corrective action planning.
Lab Control Services	Fully managed lab environments for research, testing, and training. Configuration, compliance monitoring, calibration, and controlled-access management.
HVAC & GMP Services	Design, implementation, and maintenance of HVAC systems for controlled environments. Continuous monitoring, GMP compliance, preventive maintenance, and validation.
AI Implementation Strategies	AI readiness assessments, use-case identification, model selection and integration, workflow automation, and change management to embed AI into business operations.

WHY HLOGIX?

<p>Client-Centered Delivery We treat your business goals as our own, providing tailored solutions that match your specific needs.</p>	<p>Regulatory Expertise Deep experience with FDA 21 CFR Part 11, GMP standards, and IQ/OQ/PQ qualification in regulated industries.</p>
<p>End-to-End IT Solutions From strategy through implementation and ongoing support — one partner across your entire technology lifecycle.</p>	<p>Commitment to Excellence Rated 4.8/5 by clients. Honest, transparent services with a continuous learning culture.</p>

CORE VALUES

- Committed to delivering the best outcomes for every client
- Honest and transparent services — no surprises
- We care for your business just as we do our own
- Continuously learning and adapting to emerging technologies

AI IMPLEMENTATION STRATEGIES

HlogiX guides organizations through the full artificial intelligence adoption lifecycle — from initial strategy through production deployment. We work alongside your team to identify high-value AI opportunities, select the right technologies, and build the governance frameworks needed for responsible, scalable AI use.

AI Service	What We Deliver
AI Readiness Assessment	Evaluate your data infrastructure, talent, processes, and culture to produce a prioritized AI roadmap aligned with business objectives.
Use-Case Identification & Prioritization	Facilitate discovery workshops to surface high-ROI AI opportunities — from predictive analytics and NLP to computer vision and process automation.
Model Selection & Integration	Recommend and integrate the right AI/ML frameworks, pre-trained models, or custom solutions into your existing applications and workflows.
Intelligent Process Automation	Combine AI with robotic process automation (RPA) to eliminate repetitive tasks, reduce error rates, and accelerate throughput across operations.
Data Strategy & Governance	Establish data pipelines, labeling workflows, quality standards, and governance policies that underpin reliable, compliant AI systems.
AI Change Management & Training	Equip your workforce with the skills and mindset to adopt AI tools confidently through tailored training programs and organizational change support.
Responsible AI & Compliance	Embed fairness, transparency, explainability, and auditability into AI deployments — ensuring alignment with regulatory and ethical standards.
