COMPANY OVERVIEW

HlogiX LLC is a Virginia-based information technology firm serving federal, state, and local government and the prime contractors who support them. Founded in 2017 and headquartered in Chantilly, Virginia, HlogiX delivers IT consulting, managed services, application development, and AI implementation, with specialized depth in regulated and compliance-driven environments. We are SAM.gov registered and structured to support set-aside opportunities and teaming arrangements that build measurable mission outcomes.

Our team pairs modern, AI-enabled delivery with the rigor and accountability the public sector requires — across IT infrastructure, cybersecurity, cloud, software engineering, and FDA-regulated environments.

DIFFERENTIATORS

- AI-enabled delivery: practical AI adoption — readiness assessments, automation, and governance — that modernizes operations without adding risk.
- Regulatory & compliance depth: rare command of FDA 21 CFR Part 11, GMP, and IQ/OQ/PQ qualification for high-assurance environments.
- End-to-end IT lifecycle: one accountable partner from strategy through implementation and ongoing managed support.
- Teaming-ready: serves as a named subcontractor with defined workshare, bringing genuine technical depth to primes.
- Local and responsive: Northern Virginia-based, close to federal agencies across the National Capital Region.

CORE COMPETENCIES

Capability Area	Description
Managed IT & Help Desk	Proactive, AI-augmented IT operations and end-user support — monitoring, maintenance, and service desk that keep agency systems secure and running.
IT Consulting	Network management, cybersecurity advisory, cloud strategy and migration, software selection, and system architecture design and optimization.
Cybersecurity & Compliance	Security assessments, risk management, and compliance consulting — including FDA 21 CFR Part 11 and GMP-regulated environments.
Application Development	Custom, scalable, secure software — web, mobile, and enterprise — built to government requirements from design through deployment.
Project Management	End-to-end lifecycle support: planning, execution, monitoring, and closeout with on-time, on-budget delivery and rigorous quality standards.
AI Implementation	AI readiness assessments, use-case identification, model selection and integration, intelligent process automation, and responsible-AI governance.
Regulated Environments	IQ/OQ/PQ qualification, audit support, lab control services, and GMP/HVAC validation for controlled and high-assurance facilities.

PAST PERFORMANCE

U.S. Department of Agriculture (USDA) — Subcontractor. HlogiX provided IT technical services in support of a USDA engagement as a subcontractor, contributing specialized expertise to delivery on a federal contract. Additional references available upon request.
